Israel's Technion has graduated 72,000 of the world's best and brightest scientists, engineers, physicians and leaders.

Technion's researchers are finding ways to safeguard your health and the health of your loved ones.

Israeli Professor Moussa Youdim and Dr. Silvia Mandel have discovered a powerful antioxidant that protects brain neurons from dying—is one of the main components of green tea.

By following this trail, they hope to create powerful new drugs to keep Parkinson's, Alzheimer's and other neuro-degenerative diseases at bay.
